# How you can help

You have hopefully acknowledged the issue, but what can we do?

There are two temporary fixes: reducing your amount of plastic waste & properly recycling the plastic you do make.

You can do that by bringing all of the plastic waste you make that doesn't go in your curbside blue bin to any one of the 3 recycling depots we have noted to the left.

To stop using using plastic: say no to restaurants when they try to give you a straw, bring your own bag when you go shopping, etc.
